The following 10 lots originate from the same collection, carefully built up over the years with the emphasis on the appearance of the stamp with additional examples included to show the various shades and postmarks (which where possible have been identified). As such, the condition is mixed in places but any faults have been highlighted, along with identification as per both Michel and SG catalogues. Whilst we cannot guarantee the identification in all cases, there appears to be a reasonable level of accuracy and as such, the stated catalogue prices are based on the vendor's figures. Many of the stamps have expertisation marks from various German experts (Brettl, Pfenniger, Prochold Seeger etc) and have in most cases been obtained from reliable sources. They are offered on stockleaves and are predominantly used
