THE JAR REPRODUCTION

September 1923: Local Issue for Brunswick

Watermark: None
Separation: Perf 11½x11½ (comb)

Printing Method: Typographed
Printer: Borek & Behrens
Paper & Gum: Coloured paper

These labels were produced by the firm Borek & Behrens, who appear to have been stamp dealers, their use on inland and overseas mail including registered and insured letters was, however, not objected to for a period of two to three weeks. Thereafter the use of these labels was prohibited. The warranty on the next page makes it clear that while there may have been an element of official sanction the object of the issue was primarily philatelic.

This cover appears to have passed through the post. The reverse bears a Lucerne receiving mark dated 20 September that is compatible with this. It is worth noting that the franking amounts to 275,000 reichsmarks, whereas the appropriate for a registered letter of less than 20g sent to Switzerland was 150,000 marks.

Valid during 09&10/1923

THE JAR REPRODUCTION

September 1923: Local Issue for Halle

Watermark: None
Separation: Perf 11½x11½ (comb)

Printing Method: Typographed
Paper & Gum: Coloured, glazed

These stamps are a private fabrication and their use was immediately forbidden by the authorities. They are, however, known with Halle and Schafstadt cancels, presumably applied by favour, and some covers appear to have passed through the post. In all probability both of this cover and that on the next page are, at best, cancelled by favour. It should be noted that the franking on the cover dated 18 September amounts to 180,000 marks when the correct postage rate for an registered inland letter of less than 20g was 150,000 marks and that the franking on the cover dated 20 September amounts to 430,000 marks, when the equivalent rate was 500,000 marks. The latter cover, therefore, is unlikely to have passed through the post.

Valid until: DD/MM/YYYY
